

Sarang Sharad Wagh

Python Full-Stack Developer | Backend & REST API | MySQL/PostgreSQL | AI-Integrated Applications
sarangwagh54321@gmail.com | +91 8180849725 | github.com/sarangwagh04 | linkedin.com/sarang-wagh

PROFESSIONAL SUMMARY

Final-year Computer Engineering student and Python/Django backend developer with hands-on experience architecting full-stack, AI-integrated platforms end-to-end. Built and deployed NeoCampus (AI-powered academic management) and EliteMess (multi-panel mess management with automated billing and QR payments) using Python, Django ORM, and MySQL. Currently leading a 12-member engineering team as a Full Stack Developer Intern at Indux Technology, driving backend architecture and payment-system integration for BillTea, a production SaaS billing platform. SIH college-level hackathon winner with a track record of designing scalable systems and shipping under pressure.

TECHNICAL SKILLS

Backend: Python, Django, Django ORM, Django REST Framework (DRF), Node.js/NestJS, RESTful API Design, JWT Authentication (access & refresh tokens), Middleware, URL Routing

Frontend: JavaScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap 5, Responsive Design, DOM Manipulation

Databases: MySQL, PostgreSQL, Prisma ORM, Schema Design, Query Optimization, Django ORM Migrations, Relational Data Modeling

AI/ML & APIs: Google Gemini API (LLM Integration), Tesseract OCR, pdfplumber, AI Chatbot Integration, Razorpay Payment Gateway

Architecture: MVC/MVT Pattern, Multi-Tenant/Multi-Branch Architecture, Role-Based Access Control, REST APIs, Session Management, Swagger/OpenAPI

Tools: Git, GitHub (PRs & Code Review), VS Code

Soft Skills: System Design, Problem-Solving, Team Leadership, Cross-Functional Collaboration, Communication, Event Management

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Indux Technology, Pune | Jun 2026 – Present

- Lead a 12-member engineering team building **BillTea**, a full-stack SaaS billing & invoicing platform for SMBs (NestJS backend, Next.js web dashboard, React Native mobile app), owning architecture decisions and code review
- Top individual contributor on the project, personally authoring 179 of the repository's 259 tracked GitHub commits (~69%) over ~6 weeks of active development
- Design a multi-tenant, multi-branch database architecture using Prisma ORM (20+ relational models) with branch-scoped data isolation across invoices, customers, and products
- Build core backend systems: JWT authentication with refresh-token rotation, Razorpay payment gateway integration, tiered subscription billing (Trial/Bronze/Silver/Gold), and a Puppeteer-based PDF generation pipeline for invoices and quotations
- Integrate the WhatsApp Business API for automated invoice and quotation delivery with customizable message templates

Front-End Developer Intern

Cloud InfoTechs | Dec 2024 – Mar 2025

- Built responsive, production-ready web interfaces using HTML5, CSS3, Bootstrap, and JavaScript, collaborating with designers and backend developers in a professional team environment
- Applied UI/UX best practices, cross-browser testing, and code review processes, strengthening full-stack integration skills

PROJECTS

NeoCampus — AI-Powered Academics Management System *B.E. Final Year Project | 2026*

Stack: Python, Django, Django ORM, Gemini API, Tesseract OCR, pdfplumber, JavaScript, HTML, CSS, MySQL | Live: neocampus-frontend.onrender.com

- Architected and built a full-stack, multi-role academic management platform serving students, faculty, and admins, designed for real-world college deployment and live-hosted for public access
- Integrated Google Gemini API to power a syllabus-aware academic chatbot enabling natural-language Q&A over course content

- Built an automated PDF result parser using Tesseract OCR and pdfplumber to extract, process, and visualize unstructured exam data with performance insights
- Developed subject-wise and date-wise attendance tracking with real-time dashboard reporting using Django ORM aggregations
- Implemented a role-based announcement and event management system for faculty-admin-student workflows with categorized feeds and notifications

EliteMess — Mess Management System *S.E. Project | 2024*

Stack: Python, Django, Django ORM, JavaScript, HTML, CSS, MySQL

- Designed and deployed a role-based full-stack web application with three distinct panels — Mess Owner, Student, and College Authority — each with tailored permissions and workflows
- Built dynamic menu management with attendance-based billing logic and automated monthly invoice generation using Django views and ORM queries
- Integrated a QR-code-based payment flow for students, reducing cash dependency and improving transaction traceability
- Implemented an anonymous feedback module using session-based identity management, enabling honest reporting while preserving privacy

Netflix Clone — Frontend Practice Project *F.E. | 2023*

Stack: HTML5, CSS3

- Built a pixel-accurate static clone of Netflix's UI to master core layout fundamentals — Flexbox, Grid, media queries, and responsive design — underpinning all full-stack frontend work

HACKATHONS & ACHIEVEMENTS

Smart India Hackathon (SIH) — College-Level Winner *Jan 2026*

- Led a team to first place at the college level in India's largest national hackathon; advanced to the next round
- Designed and built an innovative software solution under competitive time pressure, applying system design, Django backend development, and rapid prototyping

Adobe India Hackathon — Group Participant *Jul 2025*

- Collaborated in a team to solve real-world product challenges, gaining experience in cross-functional development and design-thinking methodologies

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Event Lead — AURA 1.0

- Spearheaded planning and execution of the college's first-ever technical and cultural fest, coordinating logistics, team roles, promotions, and day-of execution

Committee Member — Tech Fest, Annual Day, Hackathon Organizing Teams

- Contributed to planning, coordination, and execution of college-level events

EDUCATION

B.E. — Computer Science and Design Engineering *2022 – 2026*

Savitribai Phule Pune University (SPPU), Maharashtra

- XII (HSC) — 77% | 2022
- X (SSC) — 87% | 2020
